

Metric Motor Speed Pumps

VIKING

Serving Applications For:

- *Chemical Processors*
- *Grain Processors*
- *Rotating Equipment OEMs*
- *Petroleum Products*
- *And Many Others*

Flows: to 45 M³/Hr

Pressures: to 17 BAR

Viscosities: 0.5 to 22,000 cSt

Temperatures: to 150°C

An Optimized Design for High Performance

Hydraulic Coverage-6 Sizes

Typical Applications

Glycols
Glycerins
Polyols
Styrenes

Chemical Processing

Corn Oil
Soybean Oil
Rape Seed Oil
Fructose
Glucose

Grain Processing

Solvents
Oils
Additives
Fuels

Petroleum Products

speed, simplicity, and

Designed Specifically For High-Speed Operation

- The 4076/4176 Series is not a standard pump forced to high speeds. It is a new design developed for efficient motor speed operation.
- New concepts in idler and head designs deliver smooth, high-speed, hydraulic performance.
- The robust mechanical design provides traditional Viking reliability and maximum pump life.

More Performance For Your Money

- The 4076/4176 Series provides more performance from a smaller package at a lower total installed cost.
- Speed reducers, and their costs, are often eliminated.
- Viking's no-compromise design retains excellent NPSHr characteristics.
- High-speed operation without high noise levels.

Designed To Truly Fit Your Needs

- Available in the exact capacity you need, up to 45.6 M³/hr.
- The 4076/4176 Series accepts a variety of seals customized to your specific application.
- The 4076 Model mounts directly to an IEC B5 Flange motor and the foot mounted 4176 Model provides you with mounting flexibility.

Adjustable Rotor Positioning allows optimum end clearance and efficiency.

Lubricants
Fuels
Deicers

Built For Your Specific Application
Can be direct mounted to an IEC motor or foot mounted. Other options include jacketed heads, relief valves, and a wide range of elastomers.

Rotating Equipment OEMs

d Viking reliability

A Large Shaft/Thrust Bearing System with a large-diameter carbon graphite bushing minimizes shaft deflection extending rotor and seal life.

Metric Design (DIN flanges, DIN seal chamber, IEC motor mount, metric shaft extension, metric fasteners).

Optimized Gear Geometry delivers high-speed performance while controlling noise levels.

Advanced Head Design provides low NPSHr, greater pump installation flexibility. (patent applied for)

DIN Seal Chamber accepts a wide range of seal options.

Optional Bolt-On Foot

A Pump Designed For Your Application

SPECIFICATIONS

	Nominal Rating		Port Sizes	Maximum Inlet Pressure	Maximum Differential Pressure	Maximum Temp	NPSHr	Maximum Motor Speed	Sound Level
	Flow	Speed							
Size	M³/Hr	RPM	MM	BAR	BAR	°C	BAR ⁽¹⁾	RPM	dBA ⁽²⁾
HLE	5.9	1450	40	25	17	150	0.30	1450	80
ATE	12.1	1450	65	25	17	150	0.35	1450	82
ALE	21.4	1450	65	25	17	150	0.40	1450	83
KE	28.8	1450	80	25	12	150	0.55	1450	85
