

KRACHT

High Pressure Gear Pumps

KP 1

Construction

- 1 Housing
- 2 Gearing
- 3 Drive shaft end
- 4 Flange mounting cover
- 5 End cover
- 6 Double-gland bearing with special plane bearing bushes
- 7 Rotary shaft lip-type seals
- 8 Pressure field sealing for axial clearance compensation
- 9 Sealing of the housing

Function

Accordingly to its configuration – the Design Principle is illustrated by the Sectional Figure – the KRACHT external gear type pump series KP 1 is to be classified into the category of the so-called gland type bearing pumps.

All essential functional parts as the gearing and the gland bearings are located in an aluminium housing (cast iron on request possible) manufactured of a high strength extrusion alloy which are closed on each side by an end cover or by a flange mounting cover respectively.

The gearing of case hardening steel in surface hardened condition consists of the driving shaft pinion and the driven shaft pinion.

Highest manufacturing quality is assured by grinding and honing of the tooth flanks. The surfaces of the journals are superfinished.

An important reduction of the type dependent deviation of the volumetric flow and of the pressure pulsation incident thereto was achieved on the basis of the great teeth number ($z = 13$) and of the specially shaped teeth.

The gland bearings located on both sides of the gearing carry the journals in heavyduty multicomponent plane bearing bushes and contain additionally those sealing elements which serve for the pressure field sealing to compensate the axial clearance.

If required the pumps can be supplied with a Pressure Relief Valve-Type DBD... – directly attached to the pump or with special valve arrangements assembled onto the pump instead of the end cover.

Manifold pump combinations are available as well.

Note

1. External loads

Loads acting on the drive shaft end from outside impair the functions of the doublegland bearing.

Radial loads can be absorbed in dependence on the extent and the direction of the loads. Axial loads are not permissible.

To absorb outer loads only those pump types shall be used which are equipped with an outboard bearing.

2. Direction of rotation

Regarding the direction of rotation basically the following applies provided the view is directed toward the drive shaft end:

Drive shaft end rotating clockwise:

Flow direction from left to right.

Drive shaft end rotating anticlockwise:

Flow direction from right to left.

Materials

Housing	aluminium
Bearing	double-gland bearing with multicomponent plane bearing bushes
Journals and gears	case hardening steel acc. to DIN 17210 surface hardened and ground
Seals	NBR rotary shaft lip type seal $\vartheta \leq 90^\circ\text{C}$ (PU-Seal for pressure field) FKM rotary shaft lip type seal $\vartheta \leq 100^\circ\text{C}$ (PU-Seal for pressure field)

Characteristics

Mounting	flange and foot-type		
Pipe connection	flange type, threaded flange on request		
Direction of rotation	clockwise or anticlockwise		
Fitting position	optional		
Ambient temperature	$\vartheta_{u \min}$	=	-20°C
	$\vartheta_{u \max}$	=	60°C
Operating pressure Inlet port	$p_{e \min}$	=	$-0.4 \text{ bar (vacuum)}$
	$p_{e \max}$	=	2 bar
Operating pressure Short time	$p_{e \max}$	=	5 bar
Operating pressure Outlet port	$p_{e \max}$	see technical data	
Fluid temperature range	$\vartheta_{m \max}$	90°C for NBR rotary shaft lip type seal	
	$\vartheta_{m \max}$	100°C for FKM rotary shaft lip type seal	
Viscosity	$v_{\min}$	=	$10 \text{ mm}^2/\text{s}$
	$v_{\max}$	=	$600 \text{ mm}^2/\text{s}$
Recommended oil cleanliness	class 19/16 acc. to ISO/DIS 4406 ⇨ class 10 acc. to NAS 1638		
Recommended filtration	filter with filtration quotient $\beta_{25} \geq 75$ for ... 300 bar $\beta_{40} \geq 75$ for ... 100 bar		
Recommended viscosity range	v	=	$30 \dots 45 \text{ mm}^2/\text{s}$
Discharge flow	see chart page 6		
Input power	see chart page 6		
Hydraulic fluids	mineral oil acc. to DIN 51524/25 engine oil acc. to DIN 51511 bio-oils of type „HEES“ can be used up to 70°C , max. pressure must be reduced minus 20 % (use only on request)

Operating temperatur: – 40 °C to + 90 °C (short time temperature peaks up to + 120 °C are permissible)

Weights as well as moments of inertia relate to the max. bore dia. after final machining – but without key-way

Bore finish acc. to ISO-fit class H7; key-ways acc. to DIN 6885 / part 1

RA: Hub material Al

RG: Hub material part 2 and 3 GG

Coupling sleeve

Coupling sleeve part 1
Partnumber: B.0079020001

Coupling KP1 K-shaft
Partnumber: E.0187220001

Coupling

Coupling KP1 L
Partnumber: E.0104040001

Straight Flanged Connector

- 1 Hex. socket head cap screw (DIN 912 – 8.8)
- 2 Single coil spring lock washer (A6 DIN 127)
- 3 Covering nut with cutting ring (SW)

Elbow Flanged Connector

Ordering Code of a complete connection:

For the inlet port:

Straight flanged connector **GSA 1/22**

For the outlet port:

Elbow flanged connector **WDA 1/20**

Extend of Kracht delivery: Hex. socket head cap screw acc. to DIN 912 as well as single coil spring lock washers and O-rings.

Those adaptor flanges marked by * are not suitable for installations into reservoirs because the pump flange dia. is larger than the centering dia. of the adaptor flange.

Bell housing with vent hole or leakage oil-hole on request.

Motor-Pump Assemblies KP 1/. G.0A K0A 4 NL.

Product Portfolio

Transfer Pumps

Transfer pumps for lubricating oil supply equipment, low pressure filling and feed systems, dosing and mixing systems.

Mobile Hydraulics

Single and multistage high pressure gear pumps, hydraulic motors and valves for construction machinery, vehicle-mounted machines.

Flow Measurement

Gear and turbine flow meters and electronics for volume and flow metering technology in hydraulics, processing and laquering technology.

Industrial Hydraulics / Test Bench Construction

Cetop directional control and proportional valves, hydraulic cylinders, pressure, quantity and stop valves for pipe and slab construction, hydraulic accessories for industrial hydraulics (mobile and stationary use).

Technology Test benches / Fluid Test benches.
